Calgary Jimmies to Visit Madden on Sunday, July 19

On the invitation of Madden Football Club, the Calgary Jimmies will send a strong aggregation to meet the local team on Sunday, July 19, the kick-off will be at 3 o'clock. The Madden team defeated Eagle Hill recently and are anxious to stack up against the city teams. The Calgary Jimmies are sponsored by that well-known sportsman, Jimmy Condon of hockey fame. The line-up of the Jimmies will be:

Cadman, C. Boyce, Heigh, Elson, Shields, A. Boyce, Walters, Martin, Robinson, Robson, Hains, Squance, Fletcher.

Four of them are representing England in the coming International this month, namely, Walters, Cadman, Squance and C. Boyce.

Madden will field a strong team and as their recent win over the combined teams of Kneehill and Olds shows that they are ready to give Calgary a real battle on Sunday.

The Madden team will be taken from the following:

Howard, Grant, W. Cameron, K. Cameron, J. Cameron, R. W. Hunter, A. Hunter, W. Franks, D. McIsaac, A. Taylor, R. Turner, Simmons, Edwards, R. Morgan.

The baseball game between Bottrell and Madden will start 1:30 sharp in order to give the fans an opportunity of witnessing both the baseball and football games.

Madden and Bottrell are tied for first place in the league standing and a whole lot depends on this game.

School Board Meeting

The regular monthly meeting of Crossfield School Board was held on Monday night with all members present.

School repairs came under discussion. The estimate of Walter Major's, being the lowest, was accepted for removing the present roof from the tower and replacing it with a flat roof, also for repairing the roof of the main building and the eavestroughs.

It was decided to supply Mr. Belshaw with paint and have him paint outside woodwork around windows and doors.

After much discussion it was decided to make a 10 per cent. reduction on 1931 taxes. The Board will also do all in their power to collect all arrears of taxes.

Several accounts were passed and ordered paid.

They All Come Back

Mr. D. Bills and his young grandson Norman Bills arrived here on Sunday evening from Van Nuys, California. Mr. Bills set up a record for some of these speed merchants to shoot at, in driving from Spokane, Wash. to Crossfield (over 500 miles) in a day, and part of this distance through the mountains at that.

No doubt Mr. Bills was in a hurry to get to Alberta as we understand on the first part of his journey through California the temperature was only 110. Hot dog!

Airdrie Horses Win Races at Portage

Semple Brothers of Airdrie, scored two victories in the harness races at Portage la Prairie, with Jean Mercury, a three-year-old colt in 1:14 1-4 and with Hal McCarty in the 2:20 stake in 2:09 1-4. Both of these horses are sired by Hal Mercury, the sire of Kate Hal 2:01 1-4, champion pacing mare of the world in 1924.

If you are not reading Hush you are missing something.

United Church S.S. Picnic Wednesday, July 22nd.

The United Church Sunday School and their families plan to hold their annual picnic at St. George's Island on Wednesday, July 22. Meet at the church at 10 a. m.

Parents please provide lunch baskets for dinner and supper.

Local Winners at Calgary Exhibition and Stampede

Frank Collicutt & Son again proved that they are the leading breeders of Hereford cattle in America, by winning both the female and male grand championships, and both junior championships. A remarkable performance when you consider that the entry in Hereford classes was large and comprised some of the best herds in Canada and the Western States.

George Lesak of Madden won several prizes in the horse classes, getting fifth for brood mare with foal of current year; third with a foal entry; second in the yearling class and fourth in the brood mare and two progeny class. J. A. Gray of Dog Pound winning third with an entry in grade yearling class.

Pete Knight of Crossfield, recognized as the champion bucking horse rider of the world, ran into a whole peck of hard luck at the Calgary Stampede last week. On Tuesday Pete won first day money in the North American championship; on Wednesday he was putting up a great ride in the Canadian championship, when he lost a stirrup and was disqualified and on Friday he was thrown and the Stampede was over as far as he was concerned.

Harold Walsh of Madden done a whole lot of good riding to work his way into the finals of the North America bucking horse championship and as a result he came home with \$175.00 in cash, tying for third and fourth place with Joe Fisher of Kew and as a result third and fourth money was split.

Earl Havens got a good share of the money in the California cart races.

Although there were a good many from Crossfield playing the ponies, Fred Patchell was the only one from here who clicked on a long shot, and he cashed in \$138 on a \$2 ticket. There were several big shots and some half shots from this neck of the woods but they failed to get on the winners.

NEW GARAGE TO BE OPENED WITH DANCE FRIDAY NIGHT, JULY 17

The large addition to the Crossfield Garage has been completed, and Mr. Baker has decided to celebrate the occasion with a dance on Friday night of this week, to which the general public are invited. A Calgary orchestra has been secured and a good time is in store for everyone.

With this addition completed Crossfield can now boast one of the finest garages on the C. and E. line. The building is fire proof, built of hollow tile and stucco finish giving a most neat and attractive appearance. There is room for the storage of thirty-five cars. The work shop is large, well lighted, and the equipment is the very latest that money can buy. A private office and general office and parts room, a ladies' rest room with fire place and every modern convenience, go to make up a most up-to-date garage, that few if any of the large towns in Alberta have today.

Hal McCaskill, local contractor, had the building of this garage and not only did he do his work well, but he hired only local help.

CARRY-OVER MENACE IS SEEN BY GRAIN TRADE

Ottawa, Ont.—Options of two elements most vitally concerned with the marketing of Canadian wheat were presented to the House of Commons committee of agriculture here, when James Richardson, of Winnipeg, Man., and Andrew Cairns, of Winnipeg, gave evidence on behalf of the grain trade and the wheat pool respectively. The committee has been vested with the task of enquiring into the better marketing of farm produce.

General world conditions were canvassed and a variety of reasons assigned to the present depressed state of wheat markets. The presence of a 200,000,000-bushel carry-over on the North American continent this year was a factor which continued to threaten the situation, Mr. Richardson declared, and to this would be added a surplus estimated for the present year among the wheat-growing countries of another 200,000,000. In spite of this, however, Mr. Richardson was optimistic for the future.

"Our main problems today are economic," Mr. Richardson said, "but the policy of this continent during the last few years has accentuated our difficulties. We cannot escape the penalty of having allowed an undue surplus to accumulate on this continent."

Mr. Richardson was opposed to the establishment of a wheat board, whose powers would embrace the fixing and regulating of prices. He did not think that a bonus of five cents a bushel was a bad thing for the farmers.

Australia's position in the Orient had been secured through the Commonwealth's depreciated currency, he told the committee, and agreed that if Canada depreciated the currency of this Dominion it would enable the farmer to sell more, to get more of that currency for his produce and enable him, at least, to pay his debts.

Mr. Cairns predicted a national catastrophe if there should be any flooding of the market this year with the current year's crop. A break of 10 or 12 cents in the fall would be calamitous. Speculative marketing being dead, someone would have to assume the responsibility of hedging the crop until it could be directed into consumptive channels.

He had found no resentment in Europe against the policy of the Canadian wheat pool, nor did he ascribe the desire of the European countries to be self-supporting to any such resentment. Rather it was a lesson taught there by the war that they should be self-supporting.

Mr. Cairns could not see much hope in the immediate future, although there were remote indications of things becoming brighter.

Lindbergh To Visit Canada

Plans To Stop At Ottawa On Way To The Orient

New York.—Colonel Charles A. Lindbergh has stated that he and Mrs. Lindbergh planned to stop at Ottawa and some other Canadian points on their way to the Orient, but he had no plans for touring Canada preceding the visit to the Far East.

Stops will be made at Royal Canadian Mounted Police Stations in north-western Canada for fuel, but, aside from Ottawa, no Canadian cities will be visited, he said.

The day for the Ottawa visit is uncertain, Colonel Lindbergh said. It would be better known late this month or in August.

Trade With U.S.

Dominion Leads the World in Trade With Southern Neighbor

Washington.—Canada led the world in trade with the United States during May, both in imports and exports, the United States Department of Commerce announced Thursday. The Dominion took \$41,663,871 of United States goods and shipped to the United States \$24,109,517. This compares with \$69,743,470 of goods shipped to Canada in May, 1930, and \$37,396,575 of imports from Canada.

Total United States exports were \$23,827,309 in excess of imports.

Assistant Unemployment

Victoria, B.C.—Pending the commencement of unemployment relief works on a large scale in British Columbia, the provincial government has instructed government agents and provincial police in all outlying districts to give all persons who need food credit of 40 cents a day at local stores. The allowance will apply to women as well as men.

W. N. U. 1938

Approve Tariff Board

Term Of Office Is Fixed For A Period Of Ten Years

Ottawa, Ont.—After a rough passage and much buffeting, the government bill providing for the appointment of a tariff board finally passed the committee stage in the House of Commons. It now stands for third reading which, in the majority of cases, is merely a formality. It is possible that members of the Liberal opposition will seize the opportunity offered by the motion for third reading to voice briefly once again the many objections which they have developed. Discussion, however, must now be limited.

The bill, in brief, provides for the appointment of a board of three members, of which one is to be chairman, with the powers of a court of record. Its function, as indicated by the prime minister, will be to "find facts" upon which tariff duties may be based. It will endeavor to determine the cost of production of goods in foreign countries, the cost of producing similar commodities in Canada, and the rates of duties necessary to equalize costs. Its findings shall be reported to the Minister of Finance.

Salaries are placed at \$12,000 for the chairman and \$10,000 for each member of the board, and the term of office is fixed at ten years. In addition to its purely tariff activities, the board is empowered to perform certain functions under the Combines Investigation Act. It also assumes the duties now attaching to the board of customs.

Medals For Bravery

Four Young Brazilians Receive Recognition From Royal Canadian Humane Society

Hamilton, Ont.—Bronze medals for bravery have been awarded to four young men of Rio De Janeiro, Brazil, by the Royal Canadian Humane Society.

The four, cited for their heroism March 27, 1931, in rescuing three North American visitors from drowning at Copacabana Beach, are Archibald Pinto Amado, Jorge Pinto Amado, Edililton Lima Coelho and Roberto Delaballa.

The rescue occurred at the beach when three members of the Canadian trade mission to Brazil, and a friend from the United States, went swimming there. They were carried out from shore by the heavy surf and the undertow, when the young Brazilians went to their assistance.

One of the men rescued, C. E. Marley, London, Ont., failed to respond to attempts at resuscitation, but the three others, Arthur W. White, London; Thomas H. Ramsey, Edmonton; and W. F. Routh, United States friend of the party, survived.

Must Keep Expenses Down

Germany Has Been Warned To Practice Rigid Economy

Berlin, Germany.—The German Government pledged its word that the money made available by the Hoover debt plan will be used solely for the purpose of bringing about consolidation of the nation's finances. "Whatever alleviation the credit and money market receives, must rebound to the benefit of Germany's business and economy," the government said in an official proclamation.

The nation was warned in the government statement that it must be unrelenting in its efforts to economize. No increase in the expenditure of any government department will be tolerated. President Paul von Hindenburg sent a message to President Hoover, telling of the gratitude of the German people.

Reduce Insurance Rates

Reduction On Shipping Via Hudson Bay Route Is Reported

Regina, Sask.—The British hull committee has agreed to reduce insurance rates on shipping via the Hudson Bay route from four per cent to 2½ per cent on vessels valued at \$10 per ton, according to official word from London, received by the Saskatchewan government.

This reduction was made contingent upon the operation by the government of ice breakers and direction finding equipment.

The committee also agreed to extend the sailing limit to October 7 of each year for a 10 per cent increase on the above rates, and October 15 for a 25 per cent increase on the same rates.

Trade Treaty Delayed

Ottawa, Ont.—The new Canada-Australia trade agreement bearing the signatures of Australian representatives, has not yet reached Ottawa. At the request of the Australian government, arrangements have been made for simultaneous release in Canada and Australia.

No Armaments

Germany Will Not Use Reparations Funds For War Purposes

Paris, France.—The German Government, through Ambassador Von Hoesch, gave Premier Laval its solemn word that it would not use the funds realized by the reparations moratorium for building armaments. Ambassador Von Hoesch gave to the premier the text of Chancellor Brüning's statement of July 2, in which the chancellor assured the United States government that its moratorium benefits would be used for economic purposes.

After the interview, Premier Laval issued a statement in which he said that the German government had the move on its own initiative.

Paris began to prepare for the disarmament talks which it expected after the arrival here of United States Secretary of State Henry L. Stimson.

National Relief Board

Social Service Council Of Canada Will Urge Formation

Toronto, Ont.—Appointment at once of a small national board or committee, composed of the best informed and most capable persons available, to plan, co-ordinate, and direct unemployment relief measures, is urged by the Social Service Council of Canada in a memorandum of resolutions passed by that body, to be submitted to Premier R. B. Bennett and Hon. Gideon Robertson, Minister of Labor.

Rev. Canon C. W. Vernon, of Toronto, president of the council, and Dr. J. Phillips Jones, general secretary, expect to go to Ottawa shortly to present the resolutions to the government.

TAKE STEPS TO ENSURE SEED FOR DRIED-OUT AREAS

Ottawa, Ont.—The government has for some time had under consideration steps to ensure that the areas in the west facing short crops would not be denuded of the grain already in store there. The Saskatchewan wheat pool delegates in Regina decided to urge the government to purchase and retain all grain in the dried out areas until the feed and seed requirements can be assured.

There need be no fear in this regard. Hon. Robert Weir, Minister of Agriculture, said in an interview recently. The areas referred to would be protected as to the removal of grain. The government had been giving the situation close consideration for some time.

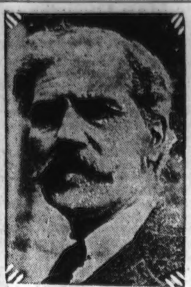

Trade Conditions In Britain Are Improving

Situation Better Than In States Says Sir Charles Gordon

Quebec, Que.—Nothing an improvement generally in conditions in Great Britain, with a trade revival taking place, Sir Charles Gordon, president of the Bank of Montreal, has returned to Canada from a brief visit to Europe.

"I think that conditions in Great Britain are improving, trade generally experiencing a revival, and that conditions there aren't as bad as in the United States," said Sir Charles.

PREMIER MacDONALD

Labor Government sustained when recalcitrant leftwingers who moved rejection of unemployment insurance anomalies bill, were defeated by vote of 231 to 19.

Looking For Advance

In Disarmament Plans

Move Is Seen As Consequence Of War Debts Moratorium

Washington.—Definite advance in world disarmament is expected by the administration as one important consequence of the war debts moratorium.

With the holiday in intergovernmental payments definitely assured and steps already taken to adjust remaining details President Hoover and his advisors made the forthcoming general disarmament conference their next diplomatic objective. Three times in as many months the chief executive has linked the increasing costs of armies, navies and fortifications directly with the world's economic burdens.

The disarmament conference will be held at Geneva in February, 1932 under the auspices of the League of Nations. The United States will participate fully and officially.

Conservatives Hold Seat

Win By Election In Ontario Riding By 156 Majority

Simcoe, Ont.—An unofficial summary of results in the Norfolk provincial by-election showed the Conservative candidate A. C. Curt, elected by a majority of 156 votes over a Liberal opponent, with the third candidate, an Independent, losing his deposit.

Unrevised final figures were: Dr. A. C. Curt, Conservative, 5,710; Eric W. Cross, Liberal, 5,554; A. C. Stewart, Independent, 272.

Both sides claimed victory before the complete and official figures could be checked.

In the last general elections, Hon. John S. Martin, former member of the Ontario cabinet and a Conservative, had been elected with a majority of 1,403.

Anglo-American Relations

Toronto, Ont.—Delegations of university professors and students from Great Britain and Canada have accepted the invitation of the Carnegie Foundation to discuss Anglo-American relations with a similar group from United States colleges at the University of Michigan from July 12 to 19. Stanley Rands will represent the University of Alberta and James A. Gibson, University of British Columbia.

DADDY DOES THE TRICK

"In all the millions that followed the progress of Wiley Post and Harold Gatty, who flew around the world in nine days, none were more intimately interested than the group presented above. Mrs. Harold Gatty, wife of the flier, with her children, Alan, five years old; Lindsay, three, and Ronald, who is nearly two. They were confident "Daddy" would get back home in "Winnie Mae" after the strenuous flight.

Had Easy Victory

Labor Government Triumphs Over Recalcitrant Leftwingers

London, England.—The government had an easy triumph in the House of Commons over recalcitrant leftwingers who moved the rejection of the unemployment insurance anomalies bill, which aimed to remove some of the unsatisfactory features existing in unemployment insurance.

The left wing, led by James Maxton, objected that the bill was wholly inadequate, but after some hours debate they failed to convince the House and the rejection motion was defeated 231 to 19.

The minority included the followers of Sir Oswald Mosley, who moved from the Labor side of the House to the opposition side. The Conservatives did not vote and several Liberals also abstained.

Communists Are Stirred

Say Deportations From Canada Will Not Cure Unrest

Winnipeg, Man.—Stirred by reports from Ottawa that Communists would be deported from Canada, leaders of the party in Winnipeg, declared such deportations would not cure the present unrest. Several believed it would stir up further trouble and aid in the spread of Communist doctrines.

W. N. Koltynsky, former alderman and a leader of the Communists in Winnipeg, who has been a resident here for 18 years, declared he would "welcome deportation." Many workers, he added, would also welcome deportation, especially to the Soviet Union, where there is no unemployment.

Manitoba Butter Takes

Grand Championship

Exhibit From Dauphin Dairy Wins First Place At Calgary

Winnipeg, Man.—An exhibit of Manitoba butter, which scored 193 out of a possible 200 points, triumphed at the Calgary Exhibition, taking the grand championship and gold medal in creamery classes, according to advice received here, Tuesday, July 7.

The championship exhibit was entered by the Manitoba Co-operative Dairies, of Dauphin. Saskatchewan Co-operative Creameries, Moose Jaw, took second place, and Manitoba Co-operative Dairies, Brandon, third.

WOULD REDUCE EXPENDITURES ON NATIONAL LINES

Ottawa, Ont.—Reduction as far as possible in capital expenditures on present works and consideration of the suggestion of Sir Henry Thornton that an out-of-pocket commission of leading Canadians be appointed to consider the entire question of Canadian transportation are likely to be recommended by the special committee of the House of Commons on the Canadian National Railways report.

In parliamentary lobbies, it is also reported that the committee may suggest to the House of Commons the abandonment of the sale of the Canadian Government Merchant Marine, the original cost of which was \$80,000,000 when purchased in the days of the Great War.

Another probability, it is understood, is a recommendation for considering the abandonment of the Canadian National steamship service between Vancouver, Seattle and Victoria.

Continuation of the West Indies service, combined with approval of a sum of \$755,000 for requirements respecting obligations under the treaty between the Dominion and the islands, will likely be proposed. The bill guaranteeing securities under the system's financing act of 1931, it is reported, will be approved by the committee. A sum of \$900,000 is required under the Maritime Freight Rates Act and approval of this sum is likely to be given.

It is understood the committee will consider recommending that the amounts Sir Henry Thornton receives in excess of \$75,000 per year salary should be published and that there should be no annuity of \$30,000 to Sir Henry after he leaves the system. Whether salaries of other officials may be made public is a matter upon which no information is available. Supporting statements of Dr. Peter MacGibbon (Cons., Muskoka-Ontario) another recommendation may possibly be that club fees and club payments of high C.N.R. officials paid by the system amounting to a large sum should be made public. The report has yet to receive final approval of the committee.

TARIFF BOARD BILL IS APPROVED BY COMMONS

Ottawa, Ont.—The amendment of Rt. Hon. Mackenzie King, moved on third reading of the bill to create a tariff board, was defeated in the House of Commons by 54 votes.

The vote stood: For the amendment, 51; against 85.

As soon as the result of the division was declared, Hon. Ernest LaPointe, former minister of justice, moved the six months' hold to the bill. This motion was declared lost without a registered vote.

The bill then received third reading.

Ottawa, Ont.—Liberal and Conservative leaders clashed once more on the old battleground of tariff principles. Asserting that the tariff policy of the government, as exemplified in changes of duty provided for in the budget, would bring about a condition of stagnation in Canada's trade, Rt. Hon. Mackenzie King, opposition leader, criticized the government proposals.

This was not a time for experiments warned the Liberal leader. The trend of the world today was in the direction of lower tariffs; high tariffs had been tried and found wanting, and nations were turning back to moderate duties.

Canada was confronted with an extremely grave situation, retorted Rt. Hon. R. B. Bennett, Prime Minister. Depressed conditions throughout the world were forcing nations to adopt extreme measures. Dumping of goods into an unprotected Canadian market might mean the extinction of industries of Canada engaged in the manufacture of those commodities. This the government proposed to prevent.

The House of Commons was engaged in consideration of its most contentious piece of legislation remaining on the order paper when Mr. Bennett and Mr. King spoke.

The customs tariff resolution, implementing approximately 200 changes in duties on imported goods, was under discussion. This resolution, the most important of those brought down in the budget, contains material for lengthy debate. The lateness of the session has not yet militated against long discussion.

The prime minister gave examples of the dumping practices which the government proposed to prohibit. A foreign manufacturer was attempting to introduce safety pins into the Canadian market. Consequently he sold a ring of 144 graduated safety pins for five cents. By so doing he threatened the life of a Montreal industry, also manufacturing safety pins, and employing 50 Canadians. Should the government stand by and see the Canadian firm destroyed, asked the prime minister.

The House, in committee of ways and means, finally got down to considering the various changes in duty provided for in the budget. The Australian treaty has not yet been brought down, and consequently a number of items affected by that pact are standing over.

The first tariff item taken up provides a duty of 20 cents per bushel under the intermediate tariff on Indian corn, under the general tariff the duty is 25 cents, while it comes in free under the British preference.

Hon. J. L. Ralston (Lib., Shelburne-Yarmouth), led a series of protests against this item. In the Maritime Provinces alone, approximately 700,000 bushels of corn were imported each year for use as poultry feed. Col. Ralston was supported by opposition members from British Columbia, who claimed that the poultry raising industry there required corn.

Sympathy From Britain

Expression Of Regret On Partial Crop Failure Heard In British House Of Commons

London, England.—"I am sure the House will greatly regret to hear the present drought is expected to have a very serious effect on crop prospects in the prairie provinces of Canada," said Rt. Hon. J. R. Thomas, secretary for the Dominions, referring in the House of Commons to the causes and probable economic effects of the failure of a large portion of the Canadian wheat crop. "As to the position generally I can only refer to the statement made by the Prime Minister of Canada on July 1," Mr. Thomas continued. This was Mr. Bennett's review in the House of Commons of the serious situation confronting the people of a large section of Saskatchewan and of smaller sections of Alberta and Manitoba, which he announced the Dominion government would take measures for relief.

Capitalism An Admirable System

Capitalism Not to Blame for Depression Says Sir Thomas White

The statement that "capitalism is on its deathbed" is a favorite with Socialists, Communists and other kinds of radicals. It has been repeated so often without contradiction that people who are not well-informed on financial and economic subjects may have come to believe that it has some foundation. Sir Thomas White therefore did a public service in declaring at the meeting of the International Association of Comptrollers and Accounting Officers that society as constituted in Canada and the United States offers the best possible way of human life if administered with sanity and judgment.

Sir Thomas admitted that capitalism is on trial because so many people question its advantages. "Nevertheless," he said, "the fault is not in the capitalist, the individual system. It is an admirable system. The fault is in ourselves." He went on to show that if people were extravagant, if credit became inflated, this misuse of the system would exact its penalty. The good, old-fashioned principles of thrift and economy would gradually correct the present depression as they had many earlier depressions. "Don't blame the system," he said. "Blame yourself."

No one can question the competence of Sir Thomas White to speak on this subject. His words will correct an impression which has gained some headway. They will help to reinforce confidence in the future.

—Toronto Mail and Empire.

Ready To Plunge Again

Many People Waiting Opportunity To Play Stock Market

We suspect that a large section of the public is waiting to take another round out of the stock market.

Human nature will never be cured of the idea that it can get something for nothing, and if the opportunity looks good enough will leave all else and cling unto a chance that two and two will make five.

The stock market was strong poison for thousands of Canadians two years ago, but readers will have noticed that when the market showed a gain of a few points following the war debt adjustment news, the halls of the brokers' offices commenced to fill once more with men who gazed wistfully at the changing figures on the board.

Let stocks advance 10 points and the rush to prove once more that two and two makes five will knock you down. —Regina (Evening) Leader-Post.

Grain Exhibits

Many Entries Received For Calgary Board of Trade Competition

Over a thousand application and entry forms were mailed to farmers in the Calgary district for the annual Board of Trade standing grain and good farms competitions this year, says J. H. Hanna, secretary of the Calgary Board of Trade. Last year about 50 farmers took part in the competitions and it is expected that a similar number will participate this year. The rules, regulations and prizes will be the same as in former years.

Up To The Dominion

Premier E. F. Tammie, commenting on the division of the Supreme Court of Canada in the radio reference repeated what the provincial government had already declared, that it believed the matter to be one largely for Dominion jurisdiction.

The world's largest coin, a plate of copper 10 inches square, issued by Frederick of Hesse Canal in 1731, to represent the equivalent of \$3 was sold in London, England, recently for \$18.75.

The first women to use the new air service from Central Africa to Europe were Dr. Margaret Holliday and Mrs. H. R. S. Stum who flew 5,000 miles from Kisumu to London.

"You are on the stock exchange. Tell me something that is sure to rise."

"The thermometer!" — Moustique, Charlier.

W. N. U. 1898

Hints For the Housewife

Might Be Useful When Things Go Wrong in the Kitchen

Too much salt often has spoiled the soup. A remedy for this is to add from half a cup to a whole cup of sliced raw potatoes to the sauce pan or soup. Let stand 10 or 15 minutes, remove potatoes and serve. The potatoes absorb the excess salt.

Delicately flavored vegetables such as asparagus and peas require very little salt, particularly when dressed with butter for serving. Use salt sparingly, for it's easy to add salt to suit individual needs.

If the mayonnaise separates, take another egg yolk in a fresh bowl and slowly beat in the curdled dressing, continuing as usual until all the lemon juice and oil is used.

If a crusty sauce curdles, beat it well with a Dover beater. This same beater often will beat the lumps out of a white sauce that has been made in too big a hurry. If the sauce is very lumpy it can be rubbed through a fine sieve and reheated.

A tomato cream soup that shows an inclination to curdle can be converted into a thick tomato puree by adding butter and flour rubbed together in the proportion of 1 tablespoon butter and 1 tablespoon flour to each cup of soup.

B.C. Plans Reforestation

Artificial Planting Resorted To For First Time In Province

Reforestation on a large scale is contemplated in B.C. The province has 8,500,000 acres in timber reserves, but, in addition, is now investigating areas along the coast especially suitable to the reproduction of Douglas fir. While natural reforestation must be depended upon for the re-stocking of most logged-over lands, next year, for the first time in the history of the province, artificial planting will be resorted to.

Two of the areas likely to be selected lie about Harrison Lake and Powell Lake. The first embraces an area of some 500,000 acres between Harrison and Alouette Lakes and the latter, which already contains some 300,000,000 feet of mature timber and second growth, lies at the head of Powell Lake and embraces the upper watershed of Powell River and Lois River.

The extent to which re-stocking will be carried out is indicated by a statement that 800,000 seedling Douglas fir trees will be planted out in 1932 and the following year.

Has Saved Many Lives

Captain Sir Arthur Rostron, commander of the Cunard Line, who retired recently after 36 years' service with the Cunard Steamship Company and 46 years as a sailor, has saved more lives than any other commander afloat. It was he who, as commander of the "Carpathia" in 1912, steamed at full speed for 60 miles to the aid of the sinking "Titanic" and rescued more than 700 passengers. He is 62 years of age.

The old stenographer, who was leaving, was posting the new one on the characteristics of the boss. "You'll find Mr. Brown a man of few words," she said.

"Gee! I'm in luck!" thought the green stenographer. "I don't know very many."

The first formulas for baking powder were developed in the United States in 1850.

Historic Landmark May Disappear

Adelphi Terrace May Disappear In Modernizing of London

Adelphi Terrace, long noted for its literary associations, and some of the adjacent property may disappear in the modernizing of London. If the Adelphi estate is sold at auction, this autumn.

This lovely and historic backdrop of eighteenth century life will be missed by none more than American visitors, most of whom include it in their London pilgrimages. But inevitable progress has sounded the knell of the tiny street perched high above the Embankment Gardens, overlooking the Thames.

Sir James Berrie still lives in the corner house on Adelphi Terrace but his erstwhile neighbor, George Bernard Shaw, has moved to Whitehall Court. David Garrick lived in the centre house of the terrace within a few hundred yards of the scene of his stage triumphs, and there he died in 1779. It was here that Raleigh lived and young Dickens worked. It was here that the brothers Adam erected on the river front of Old Durham house the finest architectural block in London. At numbers 6 and 7 the Savage Club has had its home for many years.

Beneath the terrace are the no less famous Adelphi arches, which also are doomed. When these arches, built by the Adam brothers in 1770, a new home will have to be found for the stocks of wine said to be the largest in the world now reposing in their dark cellars. Six great wine merchants keep their stocks in these cellars, any one of which can hold 60,000 bottles of fine vintage, carefully laid away.

Many bins represent the purchases of noted connoisseurs of wine whose stocks are kept there during the years they are undergoing the process of working. The time is not so very long ago when the river flowed right up to the arches and barges unloaded their wine cargoes there.

Has Many Possibilities

English Language Can Be Used In Various Ways

The English language should be popular because one can do so many things with it.

At a dinner given to Prof. A. H. Young of Trinity College in Hart House, Toronto, Colonel H. C. Osborne in proposing the toast to the guest of honor, referred to him as a stickler for punctuality. On one occasion, said Colonel Osborne, a student, after frequent admonitions for tardiness, was the first to appear for a lecture. He was commended by Professor Young in these words: "I see you are early of late. You used to be behind before. But now you are first at last."

Not So Good

There is a man in our town, and he was wondrous wise. He swore by all the gods above he would not advertise! But one day he did break this rule; and hereby hangs a tale: The ad was set in real small type, and headed "Sheriff's Sale."

Toy balloons are used by coast artillery officers in determining wind conditions.

It isn't advertising that is costly. It is oblivion.

A Mechanical Brain

New Calculating Machine Thinks Quickly In Queer Way

Invention of a mechanical brain whose grey matter is mostly light, has been announced by the Massachusetts Institute of Technology. The brain is a calculating machine, which makes use of light by a trick almost as simple as the cutting out of paper dolls. It performs in a few minutes calculations which require anything from hours to days.

It analyzes graphs by turning them into light. Graphs are lines showing averages. They are the lines which rise and fall, like a tracing of mountain peaks, to picture anything from a series of business cycles to the variations of good radio reception.

The paper on which these graphs are traced is treated so that the portion below the graph is transparent. The effect is like cutting out paper dolls outlined as openings in the original card.

An Ancient Food

Honey Used As Food Since the Dawn Of History

Honey is one of the oldest foods of man. There is little doubt that our early ancestors discovered the honey of the wild bee long before they learned to make bread.

The honey of antiquity was likely as good as that of today except that different flowers at that time gave it a flavor different from that of our modern product.

Honey is unique in that it is the only unmanufactured sweet available in commercial quantities. It contains simple sugars, easily absorbed by the human system. Honey contains in limited quantities practically all the elements of a perfect food except the vitamins.

There is no honey other than that made by bees, and therefore it is a safe food to use because it is clean and pure.

Longest Day Not Fixed Date

Director, Of Dominion Observatory Gives Reason For Change

Sunday, June 21, was not the longest day in the year in Canada this year, as is the common impression. Technically the longest day was June 22 this year.

Dr. R. Meldrum Stewart, director of the Dominion Observatory, said that the method of reckoning is the time at which the sun is farthest north. Some years it is only a matter of seconds difference as to which day is actually the longest according to this reckoning.

"Oh, Mr. Policeman—a man has been following me."

"Are you sure he was following you?"

"Yes, I went back two or three times to see if he was coming."

The naturalist limits the use of the word "bug" to insects whose mouth parts are like a tube through which food is sucked, differing from insects that bite and chew.

Helium, first discovered as a gas in the spectrum of the sun, gets its name from the Greek word helios meaning sun.

In a black bass family the male prepares the nest and later stands guard over the eggs.

Vegetables Are Being Improved By Science

And Consuming Public Is Slow To Recognize Fact

Slow as science progresses in the improvement of food commodities, it still is several jumps ahead of the consuming public, according to vegetable specialists at Michigan State College.

Most consumers still order "string beans" when they purchase fresh and canned vegetables, but in reality, the specialists assert, there no longer is such a commodity as string beans. Plant breeders at Michigan State College and at various agricultural experiment stations have bred the "string" out of wax beans.

In breeding out the strings, the scientists have further improved the vegetable by breeding more "snap" into the pods. Vegetable specialists declare the proper name for string beans now is snap beans or wax beans. Freshly picked wax beans now readily snap in breaking, making it unnecessary to use a knife in preparing for the table.

Scientists also have improved other vegetables. Prof. Geo. Starr, who is a member of Michigan State College, developed red beets which will not fade in cooking or processing. When he undertook this project many varieties of beets turned pink and even white in cooking.

Considerable work also was done in the development of earlier maturing varieties of sweet corn, in breeding a higher sugar content in sweet corn and cantaloupes, in reducing the seed content of tomatoes, in advancing maturity of tomatoes, and in increasing yields per acre, in breeding "yellow" resistant varieties of celery and cabbage and in improving standard varieties of onion.

The average consumer today little appreciates the improvements made in most vegetables and green stuffs by scientists in the last decade or more, according to vegetable specialists. The improvements have been made so slowly that few persons outside the experiment stations and agricultural colleges have been aware of changes in quality or growth characteristics.

The public's attention usually is not called to developments in the truck gardening industry until some new pest or disease makes the supply and retail prices are influenced there by. Many new discoveries by scientists have gone unnoticed, the specialists assert, because they have not materially affected the consumer's pocketbook adversely.

The average consumer is more concerned over whether insects destroy crops or the drought curtails production than in any improvements which scientists may effect in varieties, in the opinion of horticulturists.

The Real Cost Factor

Home Grown Feeds Help Greatly To Reduce Production Expenses Of Live Stock

In order to reduce production costs of live stock and live stock products, high acre yields of home-grown feeds are the prime requisite, animal husbandry experts of the Dominion Department of Agriculture assert. One must measure the milk production of the herd not as so many pounds per cow, but per acre of land that grew the crops that in turn fed the herd. Only then will they exist in proper relationship. This means thorough cultivation and efficient farm practice—better than ever before.

Importance Of New Route

Shipments Via Hudson Bay Will Greatly Benefit Western Business

Information is made that first shipments of wheat over the new Hudson Bay route will be made this fall. It is not proposed to begin shipments of other commodities until after first wheat shipments have been made.

The establishment of a route via Hudson Bay for the transport of Canadian wheat, cattle, and dairy products to the markets of Europe has been a possibility long anticipated by farmers and business interests of Western Canada. The objective which they sought might be summed up in the following illustration: From Vancouver to St. John, the eastern seaport of New Brunswick, is 3,369 miles, with an ocean voyage to Liverpool of 2,710 miles—a total of 6,079 miles. The Hudson Bay route provides a journey of 5,245 miles from Vancouver to Liverpool. From Edmonton to Churchill is only 1,538 miles, but voyage from there to Liverpool being 2,938 miles.

The products of Western Canada now reach the British market either by way of the Great Lakes or by the Pacific ports and the Panama Canal. By the latter route the distance from Edmonton to Liverpool is 10,701 miles, but by the Hudson Bay route it is merely 4,574 miles.

The great importance of the new route from the point of view not only of the saving of time and the cutting of cost, but also from that of trade expansion, is expected to have outstanding effects upon the development of Western Canada.

Ideal Automobile Insurance

Would Have Higher Premium For Careless and Reckless Drivers

No automobile insurance bill will be satisfactory unless it provides penalties in the way of higher rates for careless and reckless drivers. The records of the state of Massachusetts and others show that a very large proportion of the accidents are caused by experienced drivers—men who seem to be getting into trouble continually. An investigation in Illinois of the records of drivers involved in fatal accidents shows that every one of them had a previous accident record. Some had been involved in three or more previous accidents. This is a type of driver who just won't be careful. The way to curb these fellows is to make recklessness costly. They ought to be made to pay heavily for insurance.

Mixed Farming In Manitoba

Syndicate Has Purchased Land For United States Settlers

Mixed farming on a large scale will follow the arrival in Manitoba during the summer of a number of farmers from Minnesota, North Dakota and Wisconsin under a colonization scheme sponsored by a Minneapolis syndicate.

The syndicate, through a Winnipeg agent, has purchased 30,000 acres of farm lands in the Lakeview district, north of Portage la Prairie, about five miles northwest of Winnipeg, and is negotiating for another 30,000 acres in the province though its location has not been disclosed.

The vanguard of the United States settlers is expected to arrive in the Lakeview district soon.

Looking For Business

A notice in the Virginia Churchman reads:

"We have decided to reduce our charge for an obituary notice from \$3 to \$2 a word. We hope that this reduction will be the means of making this column used more by our church people."

Bridge Arch Forms Farm Arizona's oldest farm is a five-acre plot forming the top of the arch of Goodfellow's natural bridge in the colorful district north of Roosevelt dam. The soil of the farm is good. The bridge is 180 feet high and has a wall to wall spread of 250 feet.

You can tell a polite man. He sits at a table and sips water while the vulgar table-pounder gets service.

"Who crushed your silk hat like that?"

"Pardon me, that is my wife's new hat." —Nagels Lustige Welt, Berlin.

THE PROPOSED STRAIGHT NORTHERN TRANS-CANADIAN HIGHWAY ROUTE

The above map shows the transcontinental line of the Canadian National Railway from Quebec City to Winnipeg alongside which it is proposed to lay the Trans-Canadian Highway. Completed portions built as provincial highways run from Cochrane to Hearst in Ontario and Senneterre to La Ronge in Quebec. The irregular line arising in Ungava depicts the height of land in Hudson Bay, along which many mining developments have been uncovered. It is claimed that the distance between Montreal or Ottawa and Winnipeg will be shorter by 200 miles, following this Northern straight route, when a Quebec feeder road from Maniwaki to Senneterre is completed. Its advocates urge that besides providing an all-year road for local and inter-provincial use, promoting agricultural settlement and development of unbelievable natural resources, it would make accessible Canadian and United States tourists an enormous hinterland of unparalleled hunting and angling opportunities.

real or Ottawa and Winnipeg will be shorter by 200 miles, following this Northern straight route, when a Quebec feeder road from Maniwaki to Senneterre is completed. Its advocates urge that besides providing an all-year road for local and inter-provincial use, promoting agricultural settlement and development of unbelievable natural resources, it would make accessible Canadian and United States tourists an enormous hinterland of unparalleled hunting and angling opportunities.

Fifty Per Cent. Of Cattle Hides In Canada Last Year Were Damaged By Warble Fly Grubs

Fully half of the 1,300,000 cattle hides taken off last year in Canada showed unmistakable evidence of damage by warble fly grubs and the value of the finished leather produced from these hides was reduced by at least \$700,000. The extent of the additional loss in reduced milk and beef production cannot be determined, but it is probably equal to, or greater than, the direct damage to hides and leather.

According to Dr. W. E. Graham, of the National Research Laboratories, Ottawa, who secured this information from Canadian packers and tanners in connection with the leather research programme on which he is engaged, 15 per cent of all hides taken off in 1930 had open grub holes. Damage is most serious during the first six months of the year,

The holes in this piece of leather were caused by the Larva of the Warble Fly

39 holes in a piece of leather only 13 1/4 inches long.

when some tanners refuse to buy Canadian hides. In April and May, 1930, the percentage of hides that were "grubby" ran as high as 45 or 50 per cent. Dr. Graham states that more grubby hides are found on western range stock than on other cattle and that the percentage is 10 per cent greater on steers than on cows. One tanner gave his opinion that 95 per cent of Canadian hides showed the unsightly signs of present or previous infestations.

The warble fly grub, hatched out from eggs laid on the legs of cattle, work their way through the skin, thence to the gutlet and eventually out through the animal's back. They leave holes which gradually close but always result in a permanent scar which reduces the quality of the leather.

Hundreds of holes caused by grubs have been counted in a single hide. The area affected is limited to about 10 per cent of the hide, or 4 square feet, but is the best part for the production of leather. Samples of leather made from affected hides submitted to the Research Laboratories have the appearance of having been ridged by gun shot.

Losses from the warble fly have reached such proportions and remedial measures have been developed which are so satisfactory that the tanning industry through the National Research Council's Associate Committee on Leather has urged a concerted and determined effort at eradication. The Dominion Department of Agriculture is taking special action. Dr. Graham's estimate of losses incurred is being made available to this department and the other agencies concerned.

That the problem of eradication is by no means insuperable is indicated by the experience of Dean A. M. Shaw at the farm of the University of Saskatchewan at Saskatoon. For some years regular treatment has been applied, with the result that at present it is stated that probably not over a dozen warble fly grubs are found annually in all the cattle. Because the warbles do not fly far they can be controlled locally in comparatively small areas, although it would be considered impossible for a single small farmer to act alone in such a matter.

Farmers are recommended to seek advice as to treatment from recognized authorities.

Dr. Graham's report concludes as follows:

"How strangely they play." "Yes. They are exhibition players, and they practice while they play tennis."—Der Brummer, Berlin.

W. N. U. 1598

Praise For Livestock From Saskatchewan If Quality Maintained Will Command Highest Prices On British Market

Excellent outlook for Saskatchewan's livestock exporting industry is seen in the tribute received by W. W. Waldron, markets commissioner of the province, from the Co-operative Wholesale Society of Great Britain.

"If Canada continues to produce and ship to England this quality, she need have no doubts as to satisfactory prices, even on low value markets they would command the highest prices available," the letter received by the commissioner states. Conjecture is being voiced by Canadian cattle and livestock men as to the cause of the excellent run produced. Whether fortune entered the shipment and found Saskatchewan ready with a "good run" of stock or whether the available cheap feed has caused a liberality in feeding is a matter of concern.

A more strict interpretation by Saskatchewan livestock breeders of export cattle is looked upon by Commissioner Waldron as the likely cause for the general good quality stock shipped.

The last shipment of cattle received per the S.S. Manchester City was about the best ever received from Canada and has done more good in two days than a whole year of poster advertising or broadcasting could ever do, the quality being far superior to any Irish and equal to any Scotch," the letter relates. "The prices realized on the selected of this shipment were equal to our selected Norfolk cattle," it continued.

"Our markets will be favorable for another six weeks until the Irish grass feed cattle arrive, (young finished) will always be in good demand at top market prices," the letter concluded.

Being Afraid Wastes Time

Hours Spent In Worrying Could Be Used To Better Advantage

J. R. Lumley, editor of the Fort William, Ont., Times-Journal, says: "Did you ever stop to think that a lot of good time is wasted over being afraid? Hardly any movement forward has ever been made without someone else spending time in worrying, lest it should hurt him."

"We all know how the retail merchant has been scared almost to death of the advent of the chain store. Yet, when it has come, what a lot of merchants have simply plucked up their courage, brightened up their business methods, done a lot more good advertising and found that the chain store that had opened next door had actually helped rather than hurt them."

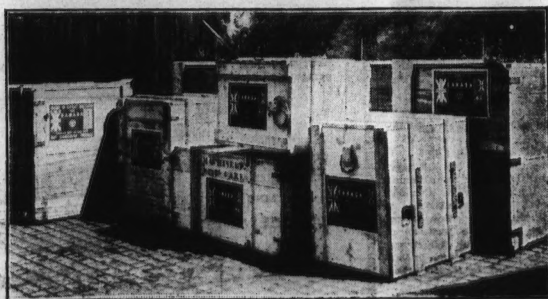

"The railway is afraid of the bus line, the advertising manager of the newspaper is afraid of radio. If all the time that is spent in nursing fear were devoted to studying the best methods of meeting new conditions and turning them to one's own use by co-operation, if competition won't work, and by liberal use of advertising, most of the nightmares would vanish."

"I often think of the advice of the trainer, when he felt that his man was nervous about going into the ring, 'remember that the other fellow is just as scared as you are and the man who first quits being scared will soon be the knock-out.'"

Siam is developing its automobile roads through the jungles.

The United States has about 2,000 railroads.

"CANADA SENT US THIS ORDER. BUY CANADIAN PRODUCE"

This interesting picture, just received from England, shows the latest campaign designed by the Empire Marketing Board to boost the products of the Dominions and Colonies in the British Isles. The photograph shows a number of huge packing cases on one of the station platforms in England containing a consignment of British steel for Canada. On the sides and tops of these cases are nailed boldly labels bearing the words "Made in Great Britain for Canada." Under these words are the Union Jack and the Canadian flag in color and the words "Canada sent us this order, buy Canadian produce." This message is intended by the Empire Marketing Board to convey to all who may see it, whether at the workshops before departure, or in the course of the journey to the ports, that Canada is buying goods from the Motherland and that the people in the British Isles should reciprocate. The new scheme is meeting with an encouraging response.

Will Visit Churchill

Business Men Under Auspices of Canadian Chamber of Commerce To View Northern Activities

Churchill, Manitoba, once a lone trading post on Hudson Bay and now the scene of developments which will make it a great northern port, will be visited this fall by a large delegation of businessmen under the auspices of the Canadian chamber of commerce.

The chamber is completing plans for the trip which will be made just prior to its convention which will be held at Regina. On September 7 the party will leave Regina for the north, returning in five days' time after which the delegates, who will represent the 300 Canadian business and trade chambers of commerce from the Atlantic to the Pacific, will assemble at Regina for the annual convention.

Management of Yukon May Be Investigated

Administration Is Now Being Carried On By Canada

Administration of the Yukon territory, now carried on by the Dominion, might be the subject of an investigation, Hon. T. G. Murphy, minister of the interior, said in the House of Commons. He was asked by Rt. Hon. Mackenzie King, Liberal leader, how long the Dominion would carry on the administration and bear the whole cost.

The population of the Yukon was given as 3,500, of whom 2,500 were white people. The House passed a vote of \$185,000 for the administration this year.

Transport Minerals By Air

First Shipment of Radium Ore From Great Bear Lake By Airplane

The transportation of mineral products by airplane may seem fantastic, but will actually be adopted in Northern Alberta. The fact that the mineral happens to be radium explains its suitability for air transportation. Plans call for an airplane trip to Great Bear Lake during the present month returning with the first shipment of radium ore, of which it is expected that area will become an important producer.

World's Grain Exhibition

Space For National Exhibits In Being Taken Up Very Rapidly

Space for national exhibits in the new World's Grain Exhibition and Conference building is being taken up very quickly, a large portion of the mile and one-half frontage for these exhibits having already been applied for. Dr. J. H. Girdlebach, chairports that up to date, over 30 agronomists of the program committee, cultural experts representing many countries will take part in the conference program of the World's Grain Show, 1932.

A Freshish Earthquake

There appears to have been something almost ludicrous about the earthquake that shook the Old Country. The only casualty was a canary, which suffered a broken wing, but the quake played havoc among the figures in Madame Tussaud's famous waxworks, tumbling together and smashing the images of criminals, jockeys, tennis players and less notable personages. The re-assembling of these parts will be a delicate piece of work.

The noblest study of mankind may be man, but his favorite study is woman.

Population of Great Britain Largest Ever Recorded, But Birth Rate Is Much Lower

Where Nightingales Are Considered a Nuisance

Inhabitants Of English Village Kept Awake By Songsters

In all the world there is no song more beautiful than that of the nightingale, but the village of Merrow in Surrey, England, is so much patronized by the songsters this year that the inhabitants are beginning to speak of their "pest of nightingales."

Indeed, visitors have heard more than one person threaten to shoot the birds—if only they could catch them.

People living in the vicinity of Merrow Common, many of them folk whose work calls them early from bed in the morning, are those who complain most bitterly. For as many as five and six nightingales tune up simultaneously between 10 and 11 o'clock each night.

"There were two singing one against the other in an elm tree just outside my window the other night," one man said, "and the din was so awful that I thought I might get some sleep in the back bedroom. But it was no better there, because another nightingale was singing in the pear tree in my garden."—London Morning Post, England.

356 YOUTHFUL

Here is a house you'll love. It's not alone flattering and youthful but thoroughly wearable.

A dotted crepe silk made the original in white ground with skipper blue nickel sized dots. It's a combination that fits into many color schemes. It's a type that may be worn with a suit or with a separate contrasting skirt or made as a complete frock worn with a matching skirt.

Net, eyelid batiste and lace are dainty suggestions.

Handkerchief linen, printed batiste, dotted swiss, pastel crepe silk and satin are ideally suited to this model.

Style No. 356 may be had in sizes 16, 18, 20 years, 30, 33, 40 and 42 inches bust.

The 36-inch size requires 2 yards of 39-inch material.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Willing To Take Chance

People are getting more air-minded every day, or maybe it's the unemployment situation. Fearing that no work would be on hand to leap from a balloon at the height of 1,500 feet, the Audubon Park Commission, New Orleans, advertised an offer of \$3 for every minute in the air. The advertisement was answered by 121 men.

The sun's temperature at its outer radiating surface is 6,000 degrees, absolute Centigrade scale.

The biggest population ever recorded for Great Britain—and the lowest birth rate in the last 50 years—are features of the preliminary report of the registrar-general, dealing particularly with England and Wales, following the census of April 28 last.

The population of Great Britain on census day was 44,790,455. The population of England and Wales was 39,947,931, and of this figure there were 20,809,087 females to 19,138,844 males.

The total population rate—685 persons to the square mile—is higher than in any country recorded, with the probable exception of Belgium.

But the country now ranks lower than any other except Sweden in the birth rate. Births registered were 8,930,000, compared with 8,281,000 in the previous census.

"Despite the fact that the marriage rate has been well maintained, particularly at the younger ages at which the bulk of births occur," says the report, "and despite the further fact the exceptional post-war spurt in the birth rate itself had only just passed its maximum at the beginning of the decade, the total births registered are 1,250,000 fewer than in the preceding period, which covered the war years, when the birth rate sank to levels never before recorded."

"The full significance of the fall will be but dimly appreciated for many years. Any temporary satisfaction felt in the reduction of the number of unproductive mouths to be filled during the present period of economic stress must sooner or later be qualified by realization of the more profound secular issues involved."

As a partial set-off against the decline in births at the beginning of the decade, the total births registered were more than 500,000 fewer than in either of the two preceding ten-year periods.

Trade Emporium In China

Novel Building To Be Opened In Shanghai This Year

One of the most novel modern buildings in China is to be opened in Shanghai this year. It is a trade emporium being erected by the Continental Bank of Shanghai, and occupies an entire block on Nanjing Road. The building will be seven stories high, and will have four elevators in different parts. There will be accommodations for a modern hotel, restaurants, offices and shops. To enable automobiles to reach any part of the building a "T" shaped lane will be constructed inside.

Works Both Ways

Idleness Is Bad For Sane As Well As Insane People

Idleness, says the physiologist, is bad for the insane. It is bad, too, we think, for the sane. Hard work may in some measure reclaim the insane or at least help them to justify their existence. But enforced idleness has a cruel trick of unbalancing minds that brood too deeply on the cares of this world; and before we reclaim the maimed minds of our race we should see to it that those who are still whole shall be kept whole to the end.

Not on the Program

"Rastus, I understand that you have become the father of twins."

"Yessah; Ah done call the first one Adagio Allegro, and Ah'm goin' to call the second one Encore."

"Musical names, all right. But why do you call the second one Encore?"

"Well, sah, you see, he wasn't on the program at all."

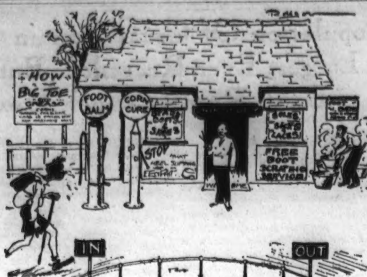

Marble buildings and statues of ancient Greece were not the white objects that they are sometimes thought to be, but were painted in bright, soft colours.

A California millionaire recently gave his friends a peacock dinner and the birds alone cost him \$4,000.

"I dream of you day and night, Miss Mimi."

"Ah, that is why you are always so sleepy."—Lustige Koeler Zeitung, Cologne.

IF THE HIKING CRAZE SPREADS

Service Stations for hikers.

—The Passing Show, London.

WORLD HAPPENINGS BRIEFLY TOLD

Displays of 260 firms were shown in the advertising and packing section of this year's fair at Leipzig, Germany.

The London Daily Herald says that Amy Johnson, British aviator who made a solo flight to Australia, is now preparing for a trip across Europe and Asia to Tokyo.

Feminist leaders of the world, after a two-days' meeting, agreed on a report to assembly of the League of Nations demanding complete equality for men and women in the matter of nationality.

Mrs. C. M. Strong, affectionately known to thousands of Canadian troops overseas during the Great War, as "mother" of the 44th Battalion, died at her home in Winnipeg recently.

His first visit to civilization was too much for Otto Knudsen, Eskimo hunter of the Lauge Rock Arctic Expedition, who became violently demented when he saw his first movie at Thorshavn, Faroe Island.

Among scientists who have been awarded long-term grants for medical research, by the trustees of the Banting Research Foundation, is Samuel Weinstein, University of Saskatchewan.

From his colleagues in the cabinet, Rt. Hon. R. B. Bennett, prime minister, was the recipient of a beautiful set of antique silver coffee dishes. The gift was in recognition of his 61st birthday.

In front of the Australian commonwealth building at Canberra will be shortly erected a 200 foot flag pole of Douglas fir, the gift of the province of British Columbia to the Australian people.

Excellent progress is being made in driving the herd of Alaskan reindeer to its new quarters at the Mackenzie River district, Hon. T. G. Murphy, Minister of the Interior, told the House of Commons recently. Latest reports said the herd was about 300 miles from its destination.

Fruit Land Taken Up

Over 50 acres of orchard and vegetable land were taken up by new settlers in the Southern Okanagan of British Columbia during the past year. Prices ranged from \$80 an acre for raw land to \$750 for improved and bearing orchard. Approximately 25,000 young fruit trees were planted.

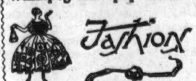

War Hero Dies In Theatre

General Bertrand, national hero for his spirited defence of Liege and for the Yser campaign during the Great War, dropped dead in a theatre at Brussels. He was credited with delaying the Germans for ten days at Liege whilst Marshal Joffre reformed the French army for the defence of Paris.

The youth who claimed that the four kinds of sheep were: white sheep, black sheep, Mary's little lamb, and hydraulic rams, was certainly not a true son of the soil.

A SMART SLIP THAT ACCENTUATES SLIMNESS

It's the new wrap-around slip that follows the shaping of the figure. It's made from a length of material.

No seams to cause conflicting lines to the outer garment. The wrapped arrangement makes it shadow proof.

The selvedge edge of the material makes a smart neat finish for the lower edge of the slip.

The side edges of the slip may be finished with a picot edge or rolled in hem. This is about all the sewing required to make it, save for a few darts through the bodice, and to fasten the shoulder straps in place.

It's straight from Paris! You'll be thrilled with the easy manner in which it's made. It will make an excellent Xmas gift.

The back, too, has perforations for deep V for evening wear. The upper and lower edge may be trimmed with lace.

Crepe de chine, crepe satin and flat crepe are popularly used. Style No. 900 may be had in sizes 12, 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 1 1/2 yards 39-inch. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Fruit Market In China

Fruit shippers of Chicago show much interest in the statement of Col. L. M. Cosgrave, Canadian Government Trade Commissioner at Shanghai, that China offers a large outlet for low grade fruit at an economical price.

The subject was brought up at two meetings in Vancouver addressed by Colonel Cosgrave.

Edmonton a City Of Homes

Eighteen hundred new homes were erected in Edmonton during the last six years, or an average of 300 new dwellings a year, it is pointed out in a special issue of the Edmonton Journal. The original cost of these homes, not including repairs and additions, figures at about \$50,000.

Of London's foreign population 34 per cent. are Russians, 10 per cent. Italians, eight per cent. Germans, and seven per cent. French. There are about 40,000 Russians.

W. N. U. 1928

Canard Week-End Cruises

Something New In The Line Of Ocean Travel

A pioneer steamship company for the past 61 years, the Canard Line came to the front this year with something new in the line of ocean travel: the week-end cruise, a voyage which gives practically everyone who can afford even a short vacation a chance to go to sea and visit a foreign port.

Already thousands have visited Nassau, down near the Tropic of Cancer, more than 900 miles south of New York, and the Islands of Bermuda, 600 miles off the coast of Savannah, and they made the round trip in four days. The better part of a day was spent ashore in sight-seeing, golfing or sea bathing.

The schedule for the summer season calls for week-end cruises to Nova Scotia, with sufficient time to visit the many historic points in the environs of Halifax, the birthplace of Samuel Canard, founder of the line which bears his name.

The Canard's week-end cruises are made by the line's express steamers, the "Berengaria," "Aquitania" and "Mauretania," among the largest and finest ships in the world.

These liners steam through the sea at a leisurely pace of 16 to 20 knots, so that the voyager may get the full good of the bracing air and the health-giving sunshine.

To the question, "What is done on these week-end cruises?" the answer might properly be: Everything! People play the regular deck games and invent new ones of their own; they bet on the day's run of the ship, as well as upon the horses on deck; they bathe in the indoor pool or in the huge tank on deck; they dry themselves by lying prone on the hatch tops or take sun baths in deck chairs; they loaf about in bathing suits, the girls displaying many types of wide-legged pajamas; in short, they do very much as they please, and they offend no one by doing so. Also there are lectures, photo plays, dances and night clubs.

Good food plays a large part in the pleasure of the day, and the catering superintendent of the line goes along to make sure that there is no economy practiced on the bill of fare; that the dishes are added rather than cut out.

The entire ship is first class for these week-end cruises. There is no forbidding sign anywhere. Passengers are permitted to use all the public rooms and every deck from stem to stern.

These trips make a strong appeal to vacationists who go away for two or three weeks every summer. They give such people a chance to begin or close the vacation period with a sea trip and yet leave enough time for a week or two in the mountains as usual.

An interesting sight is the ceremony of dropping the pilot after passing through Ambrose Channel. This is an incident which lines the rail with observers. The pilot always leaves in a small rowboat, being picked up a hundred or two hundred yards away by the yacht-like steam tender. Soon after passing there all land fades out of sight. The sight of this kind is catching the first sight of the land to which the ship is steaming. This always reminds the passengers of the thrill which came to Columbus when the first land loomed up in the West Indies.

Returning from a cruise a great crowd moves to the rail to note the arrival of the Sandy Hook pilot in his little rowboat, looking like a chip alongside the huge liner. At quarantine off the eastern shore of Staten Island in New York Bay, the port doctor comes aboard and when he clears the ship the customs and immigration men board the steamer from a coast guard cutter and check up on every passenger on the ship, leaving no loop-hole for the stowaway.

This ceremony over, the ship proceeds to her pier, where many friends await the arrival of the tourists. Once on the pier, the baggage is quickly passed and the passengers go home to tell their friends about this new idea in ocean voyaging and to urge them to book at once for a week-end tour on the wide Atlantic.

SOCIAL SERVICE IN THE EARLY CHURCH

Golden Text: "He Himself said: 'It is more blessed to give than to receive.'"—Acts 20:35.

Lesson: Acts 4:32-35; 6:1-7; 9:36-38; 2 Corinthians 9:1-15.

Devotional Reading: Psalm 112:5-10.

Explanations and Comments

Sharing Possessions, Acts 4:32-35.—There was the greatest unity of feeling and purpose in the early Christian Church; as the proverbial expression has it, they were of one heart and one soul.

Settled on the northwestern shore of the Dead Sea, and living in scattered communities throughout Palestine at this time, were the Essenes, a sect that literally had all things common. Each one deposited whatever he possessed in a general treasury, of which several managers took charge, supplying from it the needs of all; and each one regarded his property as held in trust for others.

With great power the apostles testified about the resurrection of the Lord, and great grace—God's great favor—was upon them all. The proof of the divine grace was shown in the wonderful generosity of the Christian community; as need for assistance arose among the poor, those who had lands or houses sold them and brought the amount received to the apostles for them to distribute. "Laid them at the apostles' feet" is a figurative expression which doubtless arose from the Oriental custom of laying gifts at the feet of kings; it meant that the money was left in the apostles' control.

It is interesting to recall here what Aristotle wrote to the Emperor Hadrian about the Christians of those days: "They rescue the orphan from him who does him violence, and he who has given to him who has not without grudging. And if there is a man among them who is poor or needy and they have not abundance of necessities, they fast two or three days that they may supply the needy with their necessary food."

Sharing Responsibilities, Acts 6:1-7.—The last verse of Chapter V. tells us that the disciples ceased not to teach and to preach Jesus as the Christ; now we learn that the reason was the multiplying of the number of Christ's followers.

The apostles called a public meeting of the church and put the matter before it. It was not right, they told the assembly, to neglect to supply their work of preaching to look after the distribution of food to the needy—to "serve tables"—and therefore they counseled that seven men be chosen, men of good report, full of the Spirit and of wisdom, who should be appointed for that work. As Christendom observes, "It needed great philosophy to hear the complaining of the widows." From the Greek word "diakonein," translated "serve" (serve tables, verse 2), comes our word "deacon"; and it is generally thought that from this choice of the seven for a special service the office later sprang. In Phil. 1:1, Paul refers to deacons, and in 1 Tim. 3:8-13, he notes the qualifications necessary for this office.

As for the apostles, their time would then be free to continue steadily in prayer and carry on their work of preaching and teaching.

"The secret life of prayer alone prepares and qualifies for the public life of ministry."—J. Stuart Holden.

"Rivers of vitality have their rise in those that are on their knees before God."—J. H. Jowett.

New Senators Appointed

Patrick Burns, of Calgary, Alberta, Named a Member of Upper Chamber

Patrick Burns, of Calgary, Alberta, well-known cattle man, has been appointed to the senate, Arthur Macpherson, K.C., Pontiac, Sask., has also been named a member of the Upper Chamber. Official announcement of this effect was made recently.

The new appointee from Alberta will succeed the late Senator P. E. Lessard, Edmonton, who died in April last. Saskatchewan's new senator will fill the vacancy caused by the death of Hon. J. G. Turfitt last fall. The party standing in the senate will now be: Conservatives, 47; Liberals, 48.

One more vacancy exists in the Upper Chamber at present due to the death of Hon. J. G. Turfitt last fall. The party standing in the senate will now be: Conservatives, 47; Liberals, 48.

One more vacancy exists in the Upper Chamber at present due to the death of Hon. J. G. Turfitt last fall. The party standing in the senate will now be: Conservatives, 47; Liberals, 48.

One more vacancy exists in the Upper Chamber at present due to the death of Hon. J. G. Turfitt last fall. The party standing in the senate will now be: Conservatives, 47; Liberals, 48.

A Fortune Builder . . .

Farmers now have an opportunity to secure a young Registered Jersey Bull who is backed by substantial production records at Bargain Prices.

There never was a time in the history of Alberta when such wonderful bargains in high production bulls were offered. The first generation of heifers will produce 100 pounds of fat more per year than their mothers.

A Young Registered High Production Jersey Bull Will Prove To Be a Fortune Builder For You.

Send the attached coupon for information in connection with securing a young Jersey bull. Terms.

To THE BRITISH COLUMBIA JERSEY BREEDERS ASSOCIATION

A. J. CAMERON, Secretary
CHILLIWACK, B. C.

Dear Sirs:-
I am interested in your Jersey bulls that will be fortune builders for Alberta farmers. I wish to increase the butterfat production of my dairy herd and to reduce feeding costs. Will you kindly send me without obligation full information in connection with young Jersey bulls carrying high production blood lines that are available for Alberta farmers.

Also give me complete information in connection with your plans to place these FORTUNE BUILDERS with small cash payment and balance to be collected from cream cheques during the next 12 months.

Name

Address

ME TOO!

On Sunday two lovers went to church and when the "plate" was coming he ranacked his pockets then leaned over to her and said: "I left my change in my other pants."

She hurriedly searched her vanity bag, leaned back and said: "So did I."

Tennis Notes

The return visit of the Crossfield Tennis Club to Cochrane on Sunday was marred by one of the cars breaking down near Madden, and as a consequence only Mr. and Mrs. T. Goldie, Miss Goldie, Gavin Goldie, and Mr. and Mrs. A. Stevens arrived at Cochrane. They won a majority of the sets played and were royally entertained by the Cochraneites.

The members of the Carstairs Tennis Club came down in full force on Wednesday afternoon and engaged in a friendly tournament with members of the local club. Crossfield again won a majority of the matches.

The visitors and members of the local club were entertained by Mrs. Mossop and Mrs. Thomas at the formers home following the games.

Card of Thanks

We wish to express our sincere thanks and appreciation to our many friends for the kindness and sympathy extended to us during the illness of our husband and father. We also desire to thank those who sent floral tributes.

Mrs. Nicol and Family.

Bottrel News

The Bottrel baseball team won a double header on Sunday afternoon, defeating Cremona by a score of 18 runs to 2, and Water Valley by score of 10 to 8.

The Bottrel girls soft ball team also chalked up another win on Sunday defeating the Cremona girls in a very interesting game.

Lake Parsons, former baseball star, umpired all the games and gave entire satisfaction.

BARN DESTROYED BY LIGHTNING

The large barn of R. R. Williamson, south-west of Madden, was hit by lightning during the storm on Thursday night last and completely destroyed by fire. There was no stock in the barn at the time, only two or three sets of harness which was destroyed. The loss is partly covered by insurance.

THURSDAY, JULY 16th, 1931

N. A. Johnston has purchased the Dick Patmore residence.

Mrs. A. D. Currie is expected home today (Thursday.)

Don't forget the dance in the new Crossfield Garage on Friday night. No admission charge.

Mr. and Mrs. Valk and family of Calgary, spent Sunday at the home of Mr. and Mrs. Chas. Webber.

Mrs. Everett Bills and children returned on Friday from Calgary where they had been visiting relatives for the past week.

This district has been benefited by several showers during the past week, and as a result; vegetation of all kinds is making wonderful growth.

Mrs. T. Tredaway and daughters Winnie and Edna left on Monday on an extended visit to Nottingham, England.

Mrs. Clarence Casey and children returned on Friday after spending several days visiting friends at Innisfail.

Mr. and Mrs. G. A. C. Dougan left on Tuesday on a holiday trip to the coast. Mr. Drumheller will look after affairs at the Circle N Ranch during the absence of Mr. Dougan.

Margaret Fitzpatrick and Eva Green, outstanding local athletes are now training and will enter the junior and intermediate track and field events at the Dominion and Provincial Championships at Wetaskiwin on August 11-12.

The friends of Mr. and Mrs. Robt. Whitfield of Alix, late of Crossfield, will be sorry to hear that their son George was taken to the Lacombe hospital on Monday night last where he is lying seriously ill.

The road east of town has been gravelled as far as Everett Bills corner, a distance of seven and a half miles from town. Gravel was put down this year from East Community Hall to Bills corner, a distance of one and three quarter miles. This is now a very good road, but the first mile and a half out of town needs maintaining badly. What do you say George?

OBITUARY

F. J. MONKMAN

Crossfield friends were shocked to learn on Thursday morning of the passing of F. J. Monkman of Crossfield, father of Mrs. J. R. Gilchrist and well-known in the Crossfield district. Mr. Monkman had been ailing for some time and for the past five weeks had been a patient at the Holy Cross Hospital, Calgary and following an operation on Wednesday it was thought that he had a good chance for recovery but evidently the strain was too much for his weakened condition and he passed peacefully away at three o'clock this morning.

The late Mr. Monkman was born in Bruce County, Ont. in 1857, and came to Carstairs in 1906. He leaves to mourn his departure his sorrowing wife, and a son and daughter, namely, Mrs. J. R. Gilchrist of Crossfield and Burt of Calgary; also a sister Mrs. Kirkpatrick of Acadia Valley.

The funeral services will be held from the United Church, Carstairs, on Saturday, July 18th at 2 p. m. Rev. Rex Brown of Calgary will conduct the service.

Church of the Ascension

Sunday, July 19th, 1931
Evensong 7.30 p. m. Taken by Mr. T. E. Brown of Calgary.
Sunday, July 25th.
Evensong : : 7.30 p. m.

Local and General

The Madden football team will play at Eagle Hill on Saturday.

Mrs. P. C. Griffiths and children are visiting friends at Cluny.

Miss Wilda Laut left on Monday to visit relatives at Edmonton.

A league baseball game will be played at Madden on Sunday when Bottrel and Madden clash.

F. Mossop is having a one room addition built on his home.

Hans Olsen is making extensive improvements to his home.

Mrs. Pullan of Calgary is visiting at the home of her daughter Mrs. H. Ballam.

Bill Murdoch of Clive is visiting relatives and renewing acquaintances in the town and district.

Adam Cruickshank and Frank Brown returned on Wednesday after several days fishing trip out west of olds.

Mayor Williams has had his home nicely painted. Joe Demers is also busy painting his house.

The Guild are holding a tea and sale of home cooking on the lawn of Mrs. M. Thomas on Sat. July 18th. from 3 to 6 o'clock.

The annual Dog Pound Sports will be held on Wed. July 22nd. Several members of the Crossfield Horsehoe Club will take part in the tournament.

"Heavy" Williams played third base for the Calgary Dodgers in a double header against the Texas Colored Giants on Wednesday. The nig-rose won both games.

Don't forget to put a stamp on all your cheques. Your letters also require a three cent stamp except for local drop letters.

The Pool elevator at this point will be closed for two weeks' on time after July 15th., during this time Happy MacMillan will enjoy his annual holiday.

T. Morrison's string of race horses are bringing home the bacon. His fast sprinter Keegan won the five furlong dash and Fighting Frank was third in the mile event at the Millerville races recently.

The income from your crop is just as important this year as any other and should be protected by hail insurance in one of the strong companies represented by T. Tredaway. Phone 3 or 25.

The Sunshine Junior U. F. A. and their parents are holding their annual picnic at Bowness Park on Saturday, July 18. It is expected that 25 cars will leave Crossfield at nine o'clock Saturday morning.

The girls soft ball team played at Carstairs on Monday night and came out on the short end of 15 to 24 score. Owing to some of the regulars being absent, Crossfield fielded a patched up team that was very weak in spots.

Miss Grace Williams met with a painful accident on Monday, when she and three other girls went out for a joy ride on a hand-car on the Peavine Branch. The car left the rails and Grace in jumping to save herself received a badly sprained ankle.

Miss Grace Riddell has returned to her home here after spending the past week attending classes at Olds School of Agriculture. Miss Riddell was one of the most successful students at the Carstairs School Fair last year and won the week's scholarship at Olds as a result.

The sidewalks in the Village are now being repaired. It is not the intention of the Council to put down any new board walks as they intend to try out the Fort McMurray tar sands next year.

Mr. and Mrs. Frank Purvis returned Tuesday after a 700 mile auto trip, visiting at Edmonton, Castor, Youngstown and other points. Mr. Purvis states that crops are as good here as the best he had seen, to say nothing of the districts in which they have practically no crops or even feed.
